- Safely completed 5.8 million MEC related man-hours

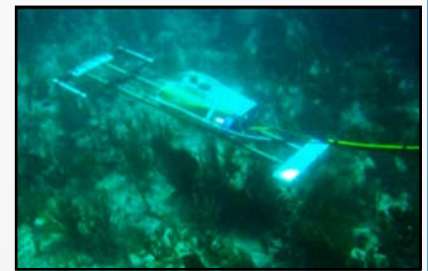

## Tidewater-USA JV Qualifications

*Tidewater operates and maintains a complex biological treatment system to remove perchlorate and chlorinated VOCs from groundwater at an NPL Site in California*

Tidewater and USA Environmental formed a joint venture (Tidewater-USA JV) that merges Tidewater's environmental investigation and remediation capabilities with USA's MMRP capabilities. Our JV provides industry-leading experience and resources, having performed 24 IDIQ contracts for the Army totaling >\$470 Million.

The Tidewater-USA JV is a small business (DUNS Number: 80208848; CAGE Code: 7LBR5), performing comprehensive environmental and MMRP investigation, design, remediation/removal, operations and maintenance (O&M), and monitoring services throughout the world.

*Underwater, an EM61 mounted on an ROV working above environmentally sensitive coral in Culebra, PR (USA)*

As prime contractor, the Tidewater-USA JV provides 298 highly qualified staff in 14 offices nationwide. The JV has an extensive staff of professionals, including eight (8) each of PEs, PGs, and PMPs, along with at least three (3) each of CIHs, CSPs, CHPs, and CHMMs. It also has 185 EOD-trained staff to support contract requirements. The JV leverages the complementary capabilities and experience of our two companies, creating a single business entity that can respond quickly and cost-effectively to any request, especially when multiple services are required.

## Joint Work Experience & Teaming Arrangements

### Joint Working Experience

- ♦ HTRW investigation and MEC clearance in support of BRAC activities, Quantico, VA – 2014
- ♦ MEC clearance in support of groundwater investigation, Whiting Field – 2016
