

Team CACI Supports DoD’s Mission-Critical Environmental and Installation Challenges

Our solutions and services support U.S. forces by delivering the following benefits to DoD environmental and installation challenges in the Pacific region:

- Maintain operational mission readiness while protecting the environment
- Facilitate testing, training, and new construction with minimal constraints and mitigation costs
- Preserve the mission capabilities of installations and training areas
- Maintain ecosystem integrity by protecting natural resources, preserving habitat, and controlling pests and invasive species
- Capitalize on modeling and simulation technologies to analyze ecological impacts of human activities
- Preserve native people archeological sites, historic sites, submerged resources, and WWII structures
- Integrate environmental considerations into system design and development to achieve efficient and effective environmental compliance throughout the lifecycle of the system
- Build partnerships with organizations and individuals to meet DoD’s environmental goals
- Gain and sustain public support needed to carry out the mission

Take Advantage of the Pacific Environmental and Installation Analysis and Program Support Contract by Following These Steps:

- The task sponsor develops a brief task statement, including statement of work, list of deliverable products, schedule, and cost estimate
- The task sponsor contacts the Contracting Officer’s Representative (COR) at Naval Surface Warfare Center (NSWC), Indian Head Division (IHD) to review requirements
- The COR verifies that the task statement is within scope and has sufficient ceiling
- Upon COR verification, the task sponsor submits funding documents to NSWC IHD: one to accomplish the task and one for a 3 percent fee
- The COR generates the technical instruction (TI). The Contracts Specialist then sends the TI to CACI for signature approval
- Upon receipt of the signed TI from CACI, the Contracts Specialist finalizes details of the contract modification
- The contracting officer reviews, approves, and signs the contract modification to authorize work
- The COR forwards the modification to the task sponsor and Team CACI, including the financial point of contact
- The Team CACI project manager conducts a technical instruction kick-off meeting with the task sponsor and begins work

Helping Sustain U.S. Environmental Security in the Pacific

We Leverage Environmental Program Management, Geospatial Technology, and Information Solutions and Services to Support Department of Defense Requirements

An Award-winning Team with Local Presence and Global Reach

CACI brings together a diverse team of companies with a broad array of capabilities that include environmental, energy, sustainability, emergency management, military munitions, community outreach, and more.

CACI is a global firm with 120 offices and approximately 14,900 employees. Our partners are large and small business environmental companies that are veteran-owned, service-disabled veteran-owned, minority-owned, and woman-owned. Team CACI includes the following:

Advancing DoD's Strategic Environmental and Installation Initiatives in the Pacific Region

Under the Environmental and Installation Analysis and Program Support contract task order, Team CACI provides engineering, analytical, and programmatic support on a wide array of environmental and installation policy, planning, organizational, and operational issues in support of the U.S. Navy, U.S. Air Force, and other DoD and federal agencies in the Pacific region in areas such as Hawaii, Guam, and the Commonwealth of the Northern Marianas.

Ensuring Mission Sustainability and Minimizing Environmental Impacts

To fulfill the unique requirements of DoD's mission, operations, and environmental security responsibilities, Team CACI offers:

- In-depth knowledge of the geologic, hydrogeologic, and environmental conditions of the Pacific
- Qualified and experienced personnel, including certified professionals in all required disciplines
- Rigorous quality assurance through an ISO 9001:2008 Quality Management System
- Rapid response to emergent needs and the reach-back capability of a global team
- Competitive rates and local team presence throughout the Pacific region

CONTRACT SUMMARY

- N00178-04-D-4026, Task Order FG05
- Cost Plus Fixed Fee
- Two-year period of performance: 9/28/2012 – 9/28/2014

Team CACI supports the Department of Defense initiatives to improve readiness, promote sustainable operations and installations, and preserve the environment.

Wide Array of Services Meets Emerging Challenges

Our wide array of solutions and services support the following key components of mission success in the Pacific region:

- Environmental Safety and Health Planning and Compliance
- Modeling and Simulation Support
- Program Management Support
- Community Outreach and Education
- Conferences, Meetings, and Reviews
- Acquisition Program Management Support

Delivering Quality-Assured Solutions

We provide the full spectrum of products and services to meet DoD's environmental security challenges in the Pacific. This includes:

- National Environmental Policy Act/ Overseas Environmental Impact Statement Services:
 - Environmental Impact Statements
 - Environmental Assessments
- Integrated Natural Resources Management Plans
- Marine Resource Assessment Reports
- Installation Encroachment Action Plans
- Range Complex Management Plans
- Operational, Training, Installation, and Environmental Simulation Models
- Programmatic Environment, Safety, and Occupational Health Evaluations
- Remedial Investigation/Feasibility Studies (RI/FS)
